Chapter 79 of the laws of New Hampshire 1935 reads in part as follows:

"The Collector shall make a written report to the town at the end of each fiscal year, which shall contain the following information: The amount of taxes set down for him to collect; the amount of such taxes collected, together with any interest thereon; the amount of discount allowed, if any; the amount of taxes abated; a detailed list of uncollected taxes, and the amount received for such taxes as were payable for any prior tax year. This report shall also contain a detailed account of the sale by him of any property for non-payment of taxes."

Therefore the following list of uncollected taxes containing the names of, and amount due from each delinquent taxpayer is appended as part of the collector's written report to the Town.

This is by request of the State Tax Commission and by requirement of the bonding companies which now demand that verification of uncollected taxes be made by local auditors.

ANNUAL REPORT OF THE GREENLAND PLANNING BOARD

February 20, 1937.

TO THE BOARD OF SELECTMEN:

During the year of 1936 the Planning Board made no attempt to mount the cannons on the Park along the Crescent, because of insufficient funds to complete. It was thought wiser to wait until fresh funds were available which, together with the balance on hand, would be enough to purchase sand, cement and stone, and do the work properly.

APPROPRIATION \$50.00

Expenditures as follows:

April 4, 1936	Grass Seed	\$6.08
July 8, 1936	Fenwick Holmes, labor	12.30
Aug. 8, 1936	Fenwick Holmes, labor	2.10
Aug. 25, 1936	Fenwick Holmes, labor	3.60
Oct. 23, 1936	Fenwick Holmes, labor	2.00
Nov. 5, 1936	State Highway Garage, grader	7.50
Total		<hr/> \$33.58

BALANCE ON HAND FOR 1937, \$16.42

The sum of \$20.00 was used for mowing and picking up loose rocks on the upper half of the park. Russell Rolston also did some mowing and picking of rocks at no cost to the town.

The sum of \$6.08 was used to buy grass seed, this was sown by Charles H. Brackett, Sr., at no cost to the town.

Mr. James Miller donated some shrubs, and also a very beautiful flower plot, which was set in the upper half of the park, causing considerable favorable comments, and admired by all persons passing by.

The sum of \$7.50 was used to pay for the State Highway grader to level off the lower half of the park.

The Planning Board recommends for this coming year that a sufficient amount of money be appropriated so that we may continue mowing by hand, seed the lower half of the park, and mount the cannons.

Respectfully submitted,

ARTHUR N. GAGNON,

Chairman.

WEEKS LIBRARY REPORT

The following is the fortieth annual report of the Weeks Public Library, showing the work for 1936-1937.

The library has been open twice a week during the year with the exception of Memorial Day and the evening of Washington's birthday and the routine work has been carried on with satisfactory results. We wish that more of the towns people would take advantage of the opportunities for enjoying good reading which the library offers. So far as funds permit we provide the best of current fiction and general literature with books for children of all ages.

Accession number of volumes	9,100
Added by purchase	127
Added by gift of individuals	39
Added by gift of State of New Hampshire	9

REPORT OF SUPERINTENDENT OF SCHOOLS

To the School Board of Greenland, New Hampshire:

It gives me pleasure to submit to you my annual report as Superintendent of Schools, the eighth in the series.

I am glad to report that our teachers, the most important factors in the success or failure of our schools, have since the last report, given as always, their best effort to the making of a constantly improving school. I know that their school day is much longer than the actual session of school. Proper setting out of work and plans for the day are assured by their arrival at the school building long ahead of the pupils it often happens, also, that other hours go into further preparation of school work after pupils have gone home. Their work is particularly characterized by sincere cooperation in all that pertains to the daily school life of the pupils. They are proud of their school. That they work hard and, in the main, successfully for the good training of their pupils, the results of our specific and general tests show. A combination of better than average skill with the will to see and improve weaknesses is the good equipment of our teachers. No week goes by in which they do not take thought together of possible ways to make their work more efficient.

Every day observation and testing of the class work in the school subjects has been, as usual, supplemented by standardized tests. Information furnished by all these means of checking lead us to the correction and improvement of procedures in the various subjects. The results of these tests are constantly available during the whole school life of the pupil. For the second year we are emphasizing training in better oral expression, in reading, in answering questions and in general conversation.

A school is known not only by the oral and written results of tests and examinations but its manners, its morale, its coopera-

tion in the general good, and its good citizenship. My reports of the past few years have spoken of these matters. I am happy to say that the constant efforts of the teachers are telling in this phase of our training and that the pupils, as a whole, are increasingly better mannered in school and out; better citizens of school, home and community. The teaching of safety, especially as it concerns the automobile and its relation to pedestrians, goes on as usual. As the results of studies in safety come to us from other states and as the several states pass more effective laws for highway safety, we may expect this phase of our work to become more usefully done.

Greenland is particularly fortunate because a desire for good child-health is general. The health of our children so affects all our family plans and hopes that this phase of school life is very important, and the value of the school nurse in this situation is well known. I am glad to report that Mrs. Sheehy's effective work of the past continues, and that her contacts with parents and health authorities are, as from the first, most pleasant and successful. I commend her report to your notice.

For the second year I submit several extra tables of statistics because, while this form of report requires a bit more study, it gives information about the schools not obtainable in any other way, or less easily presented in any other way. These tables give pertinent information about numbers of pupils, size of grades, attendance now and in comparison with other years, Greenland's own school cost and its comparison with that of other districts. They are appended to this report and I ask your interest in them.

The use of our school building for many good purposes other than those of school, necessitates an unusual amount of care in the upkeep of the building. Each year increasingly brings the need. I repeat my recommendation of last year in the matter of fuel. Soft coal adds much to the cleaning problem. Oil is not only as economical as coal but is cleaner in itself and the use of it would give the janitor more time for other duties. Incidentally, there would be no wasted fuel on warm days.

Your responsibility in the matter of god education for Greenland is much appreciated by th administrative staff. We thank you for your numerous expressions of interest and for your co-operation liberally given at all points, and we pledge our best efforts toward the attainment of our common end—the best training possible for our young people.

Respectfully submitted,

CLIFTON A. TOWLE,

Superintendent of Supervisory
Union No. 16

Exeter, N. H., January 26, 1937.

REPORT OF THE SCHOOL NURSE

To the Superintendent of Schools and the School Board of
Greenland, New Hampshire:

Following is the list of health activities in the Greenland
Schools from Jan. 1, 1936 to Jan. 1, 1937.

Number of pupils examined	102
Number of pupils weighed and measured	102
Number of pupils' vision tested	102
Number of pupils found to have defective vision	6
Number of pupils found to have defective teeth	71
Number of pupils found to have defective tonsils	4
Number of pupils found to be 10% underweight	13
Number of pupils unvaccinated	none
Number of pupils found to have defective hearing	2
Number of pupils who had tonsillectomies	2
Number of pupils who had their teeth treated	49
Number of pupils whose vision was corrected	4
Total number of visits to the Greenland School	40

You will note that there are thirteen children 10% or more underweight. This year, we have no state aid or federal aid for our underweight or under-nourished children. May I take this opportunity to ask the different organizations to set aside a certain amount of money each year for this cause.

Many children need cod liver oil and milk. Some still need dental care and many times I need money for glasses, tonsillectomies or physical examinations for very poor children.

Hot lunches would help all the children to be healthier and to do better school work. I hope that all parents who pack lunches for their children will include something hot or something to be heated in school.

I wish to thank our Superintendent, Mr. Towle, the School

Board, the teachers and the people of Greenland for their fine cooperation in my health work. I extend my appreciation to the Grange for their gift of \$5.00 for the dental clinic which was held in the school this year.

Respectfully submitted,

ELOISE B. SHEEHY, R.N.
